- Programming Languages (Pascal, C, PHP, JS, Java)
- Web Development (HTML, CSS, ReactJS)
- Database (MySQL, PostgreSQL)
- Design Tools (Figma, Canva)
- Version Control (Github)
- Self- Learning
- Creative Thinking

PROJECTS

- **Blitz (Employee Management System)**
  The Employee Management System is a web-based platform that utilizes PHP, HTML, CSS, JavaScript and MySQL. With the timely need to create a satisfied

employee base, we have proposed a web-based smart offer management system called "Blitz" to enhance the employees' satisfaction towards their workplace by mainly considering their commitments in the work that they carry.

- **BookShelf**

  The "BookShelf" bookstore is a comprehensive software solution designed specifically for a bookstore to streamline its operations and enhance customer experience. The system offers functionalities for buying, selling, and donating both new and used books. This project aims to improve the efficiency of book inventory management and simplify transaction processes.
